PROFESSIONAL SUMMARY

Associate Product Manager with hands-on experience owning product requirements, roadmap, backlog, and releases from problem definition through delivery. Currently leading a social and life-skills mobile application for adults with Intellectual and Developmental Disabilities (IDD). Brings 9+ years of QA and accessibility experience across US enterprise SaaS products, with prior leadership of QA for 10+ WCAG 2.1 AA-compliant SaaS eLearning products and a 16-person team.

WORK EXPERIENCE

Associate Product Manager | Bangalore | *Nov 2025 - Present*

- Own the product roadmap, backlog, and release scope for a live moderated mobile app, supporting 5,000+ downloads, 1,000+ subscribers, and 150+ weekly active users across approximately 9 releases and 3 core features.
- Align 7 stakeholder groups including developers, testers, graphic designers, animators, therapists, subject matter experts, and management across product requirements, priorities, usability feedback, and release decisions.
- Review Figma designs and user flows with stakeholders to validate requirements, usability, acceptance expectations, and product readiness.
- Manage the freemium, pay-per-session coaching model and approximately 20% registered-to-subscriber conversion.

Lead Quality Analyst | NuAge Edtech Pvt. Ltd., Bangalore | *Mar 2022 - Oct 2025*

- Owned quality and release readiness for 10+ WCAG 2.1 AA-compliant SaaS eLearning products serving thousands of K-12 learners across US enterprise customers, including Cambridge and Florida Virtual School (FLVS); translated customer, curriculum, accessibility, and business requirements into acceptance criteria and release goals.
- Led a 16-person QA team across the product lifecycle, partnering with Product, Engineering, Design, and Content teams to prioritize product risks, defects, and release decisions across a 10+ product portfolio.
- Partnered directly with 3 US enterprise clients to understand customer requirements and product expectations, translating them into actionable quality and release requirements and helping ensure products met customer, accessibility, and curriculum standards.
- Introduced structured defect management through Bugzilla, reducing defect-resolution time by 20% and improving visibility so Product and Engineering teams could prioritize customer-impacting issues more effectively.

Senior Quality Analyst | NuAge Edtech Pvt. Ltd., Bangalore | *Feb 2021 - Feb 2022*

- Owned quality and release readiness across 5+ SaaS eLearning products and 50+ modules, partnering with Product Development to translate US client requirements into release-readiness criteria covering functionality, UI, content, and accessibility.
- Led a 6-person QA team across regression, exploratory, and cross-device testing, identifying and driving resolution of 30-40 defects while improving early defect detection and reducing post-release issues, rework, and client escalations.
- Partnered with Product Development to establish QA standards and workflows, improving testing efficiency and providing clearer quality signals for product and release decisions across the development lifecycle.
- Delivered a first-time-right release for 5 modules of a key product, with the team receiving client appreciation after submission was accepted without client-reported issues or rework.

Quality Analyst | Focus Edtumatics Pvt. Ltd., Bangalore | *Mar 2017 - Jan 2021*

- Owned QA across 10+ eLearning products, 25+ courses, and 60+ modules serving 2,000+ users and 10+ clients, covering functionality, content accuracy, accessibility, and user experience throughout product delivery.
- Partnered with product and content teams on healthcare and eLearning engagements, including the San Francisco Department of Public Health (SFDPH) and VLC/CERT, performing content mapping, functional testing, accessibility validation, color-contrast checks, audio/video validation, and closed-caption synchronization.
- Validated products against WCAG 2.1 and ADA requirements, translating accessibility and usability findings into actionable product and content improvements; created ADA compliance documentation for VLC courses.
- Supported successful delivery across 60+ courses/modules and multiple client engagements, contributing to reduced rework, faster delivery, and improved first-time-right outcomes; worked on bilingual English/Spanish learning content and Canvas-based experiences.

CASE STUDY

- **Stable Money: Building the Repeat Fixed-Income Investor**
  Skills used: Market Sizing · User Research · Personas · RICE · PRD Writing · GTM · Metrics
  Plan to lift the 90-day FD repeat rate from 20% to 35% (target), unlocking ~₹9,000 Cr AUM with zero new acquisition
- **Google Maps: Closing the Parking Gap in Urban India**
  Skills used: Survey & Interviews · Market Sizing · Competitive Analysis · Prototyping
  Real-time 2-wheeler parking for Bengaluru (₹49 Cr SOM); 79% of 29 surveyed named live availability as top need
- **Zepto: Breaking the AOV Ceiling**
  Skills used: User Segmentation · RICE · KPIs
  Contextual bundles and threshold nudges to lift AOV 15-20% (target) from ₹540, toward ₹750 break-even
- **VitaFit Engage: Turning Workouts into a Game**
  Skills used: PRD Writing · User Stories · KPI Planning · A/B Test Planning
  Points, streaks and challenges to lift retention, targeting DAU/MAU from 15% to 25%
- **OList Retail: The Pareto Inventory Playbook**
  Skills used: Tableau · Market Basket Analysis · Pareto Analysis · Excel
  Pareto and basket analysis: toys drive ~76% of revenue and 16 of the top 20 products by revenue
- **IPL Decoded: Toss, Runs & Wickets**
  Skills used: Tableau · Data Visualisation · Sports Analytics
  Toss winners won only ~50% of matches (no real toss edge); most chose to field first across 10 seasons
- **Aid Where It Matters Most: Clustering for NGO Funding**
  Skills used: Python · K-Means · Hierarchical Clustering · Silhouette & Elbow
  Segmented 167 countries into 5 clusters to shortlist the top 5 most in need of aid
- **Credit EDA: Spotting Defaulters Before They Default**
  Skills used: Python · EDA · Data Cleaning · Bivariate Analysis
  Loan-default risk EDA: external credit score emerged as the strongest default predictor

CORE SKILLS AND TOOLS

Product Delivery: Roadmap Definition | Product Requirements | User Stories & Acceptance Criteria | Backlog Grooming | Release Readiness | Stakeholder Alignment | Defect Triage | Cross-functional Delivery

Product Research: User Interviews | Research Synthesis | Competitive Analysis | Figma Design Review | User-Centered Product Discovery

Strategy & Planning: PRD Writing | Roadmap Planning | RICE Framework | Market Sizing | Stakeholder Management | Gamification

UX: UX Evaluation | UI Evaluation | Usability Testing | User Research | Accessibility Testing | Cross-Browser & Device Testing

Data & Analytics: Tableau | Power BI | SQL | Python | Advanced Excel | Google Analytics | AARRR Funnel | A/B Testing | Retention Metrics | Cohort Analysis

Analytical Methods: K-Means Clustering | Hierarchical Clustering | Silhouette & Elbow Method | Pareto Analysis | Market Basket Analysis | Bivariate Analysis

Tools: JIRA | Bugzilla | Figma | Agentic AI

EDUCATION

PG Diploma in Data Science | IIIT Bangalore - 2022

B.E. in Computer Science | CMRIT College, Bangalore - 2015
